

Pimperne Neighbourhood Plan

Strategic Environmental Assessment (SEA) Determination Statement

This determination statement has been produced to comply with Regulation 9 of the Environmental Assessment of Plans and Programmes Regulations 2004.

The Regulations implement European Directive 2001/42/EC. This requires that the effect on the environment of certain plans and programmes should be assessed, including plans prepared for town and country planning or land use. An exception is made for plans that determine the use of a small area at a local level, if the responsible authority has determined that the plan is unlikely to have significant environmental effects. This determination statement sets out the reasons why North Dorset District Council (the responsible authority) considers that a Strategic Environmental Assessment (SEA) is required with respect to the Pimperne Neighbourhood Plan.

A Strategic Environmental Assessment Scoping Report for the Pimperne Neighbourhood Plan was submitted to North Dorset District Council and the statutory consultation bodies in June 2016. A Strategic Environmental Assessment - Options Stage report was subsequently submitted to North Dorset District Council in November 2016. The Scoping Report and Options Stage report take into account the criteria specified in Schedule 1 of the Regulations. On 19 April 2017 the SEA Options Report and the Options Draft Neighbourhood Plan were made available to the statutory consultation bodies (Historic England, Natural England and Environment Agency), as required by Regulation 9(2)(b).

The District Council received responses from all of the statutory consultation bodies by 11 May 2017 (see Appendix). Having considered these responses, and taken into account the criteria specified in Schedule 1 to the regulations, as required by Regulation 9(2)(a), the District Council considers that an SEA of the Pimperne Neighbourhood Plan is required for the following reasons:

- The Plan is likely to allocate land for 40 to 45 dwellings.
- The vast majority of the plan area is within the Cranborne Chase and West Wiltshire Downs Area of Outstanding Natural Beauty.
- The plan area includes a large number of heritage assets.

NOTE: The statement is based on the information provided. If the contents of the plan are revised and/or there is a material change in the environmental characteristics in the locality (e.g. the designation of any additional nature conservation or other environmental sites), then the comments contained in this statement would need to be reconsidered in order to take account of the changes.

Habitats Regulations Assessment

Schedule 2, paragraph 1 of the Neighbourhood Planning (General) Regulations 2012 sets out the prescribed basic condition that the making of a neighbourhood plan is not likely to have a significant effect on a European site (as defined in the Conservation of Habitats and Species Regulations 2012) or a European offshore marine site (as defined in the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007) (either alone or in combination with other plans or projects).

The District Council has consulted Natural England as to the requirement for a habitats regulation assessment.

Natural England's response with regards to internationally and nationally designated wildlife sites stated:

Based on the information provided, we can confirm that the plan is unlikely to harm any Site of Special Scientific Interest (SSSI), or Special Area of Conservation (SAC), Special Protection Area (SPA), or Ramsar Site and is not likely to significantly affect the interest features for which they are notified. I can therefore confirm that Natural England has no concerns regarding this aspect of the proposals and is satisfied that impacts on internationally and nationally designated wildlife **sites can be screened out from any requirement for further assessment.**

APPENDIX

SEA Statutory Consultation Bodies Responses

1. Natural England – received 02/05/2017
2. Historic England – received 11/05/2017
3. Environment Agency – received 05/05/2017

Dear Mr Bennett

Pimperne Neighbourhood Plan SEA/HRA Screening Opinion

Thank you for your consultation on the above dated and received by Natural England on 20th April 2017.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Screening Request: Strategic Environmental Assessment

It is our advice, on the basis of the material supplied with the consultation, that, in so far as our strategic environmental interests are concerned (including but not limited to statutory designated sites, landscapes and protected species, geology and soils) are concerned, that there are unlikely to be significant environmental effects from the proposed plan.

Internationally and Nationally Designated Wildlife Sites

Based on the information provided, we can confirm that the plan is unlikely to harm any Site of Special Scientific Interest (SSSI), or Special Area of Conservation (SAC), Special Protection Area (SPA), or Ramsar Site and is not likely to significantly affect the interest features for which they are notified. I can therefore confirm that Natural England has no concerns regarding this aspect of the proposals and is satisfied that impacts on internationally and nationally designated wildlife **sites can be screened out from any requirement for further assessment.**

Neighbourhood Plan

Guidance on the assessment of Neighbourhood Plans in light of the SEA Directive is contained within the National Planning Practice Guidance¹. The guidance highlights three triggers that may require the production of an SEA, for instance where:

- a neighbourhood plan allocates sites for development
- the neighbourhood area contains sensitive natural or heritage assets that may be affected by the proposals in the plan
- the neighbourhood plan may have significant environmental effects that have not already been considered and dealt with through a sustainability appraisal of the Local Plan.

We have checked our records and based on the information provided, we can confirm that in our view the proposals contained within the plan will not have significant effects on sensitive sites that Natural England has a statutory duty to protect.

We are not aware of significant populations of protected species which are likely to be affected by the policies / proposals within the plan. It remains the case, however, that the responsible authority should provide information supporting this screening decision, sufficient to assess whether protected species are likely to be affected.

Notwithstanding this advice, Natural England does not routinely maintain locally specific data on all potential environmental assets. As a result the responsible authority should raise environmental issues that we have not identified on local or national biodiversity action plan species and/or habitats, local wildlife sites or local landscape character, with its own ecological and/or landscape advisers, local record centre, recording society or wildlife body on the local landscape and biodiversity receptors that may be affected by this plan, before determining whether an SA/SEA is necessary.

Please note that Natural England reserves the right to provide further comments on the environmental assessment of the plan beyond this SEA/SA screening stage, should the responsible authority seek our views on the scoping or environmental report stages. This includes any third party appeal against any screening decision you may make.

For any new consultations, or to provide further information on this consultation please send your correspondences to consultations@naturalengland.org.uk.

Yours sincerely

Sharon Jenkins

Dear Allan

Thank you for your consultation on the SEA Screening for the Pimperne Neighbourhood Plan. My apologies for not responding before now.

We would normally expect the local planning authority to provide us with a prepared Screening Report with its own conclusion as to whether an SEA is required upon which our view is then sought.

We appreciate that in this instance the community has already assumed that an SEA will be required and has proceeded accordingly. On the basis that the Plan envisages allocating sites for development and that there is no Screening Report to provide evidence to suggest that there will not be a likelihood of significant environmental effects we have no objection to the conclusion that an SEA will be required.

Kind regards

David

Dear Mr Bennett

Pimperne Neighbourhood Plan – SEA Screening

Thank you for consulting the Environment Agency on the above mentioned document.

The documents reviewed, from our perspective, indicate that the development is proposed in the Neighbourhood Plan would accord with your Authority's Local Plan. Therefore, we would not anticipate that it would not cause significant environmental impacts and therefore SEA would not be required.

We have reviewed the documents and have can confirm that it has identified the key environmental issues and topics that fall with our remit.

Flood Risk

We note that they have included in the documents the relevant reference to fluvial, groundwater and surface water flood risks in the Pimperne area. This is important as it is known that this area has historically be affected by flooding.

We note that the reports have identified the potential development sites would be outside of the flood risk areas, but the access to some may be affected by flooding. We would highlight that it would be your Council's Emergency Planners that would be consulted in relation to flood emergency response and evacuation arrangements for the site.

Please contact me if you have any queries.

Yours sincerely

MICHAEL HOLM
Planning Advisor - Sustainable Places
