

Paul Kimber managed a ^{Dorset} Coop at 55

Name his counsellor Paul Kimber a councillor on the Portland town council and Dorset council.

I supported the decision up the Dorset council to dismiss the application. I consider this was the right decision by Dorset council and I feel that this should be up upheld.

represented Portland community for a number of years in one capacity or another on different councils.

I've got to know the people of the island and in the large people are very concerned if this goes application goes ahead for several reasons. Pollution climate change traffic visual impact will have a damaging affect for our Weymouth & Portland community

During this time I've seen many changes in our community and I can say I've seen many changes particularly environmental challenges that must all address.

Historic background some years ago I worked for the naval base as a ship's engineer 23 years when is closed 1996 the base and the DRA Lost 6000 workers direct and indirect workers that were affected by the closure.

At that time of the closer Weymouth and Portland B.C. Commission the report from Portsmouth university report at the time recommended that we must go over to leisure industries tourism and leisure new industries were very important. this has been and I can't say this has taken years to transform and successful having attracted Olympic Games.

The first point I would like to make regarding the proposed energy recovery facility at castle town we have to consider climate change and the ecological emergency I believe it's only right and proper that we continue to reduce waste levels overall this facility will leave a carbon footprint I do suggest we could have offshore wind turbines that would connect to the National Grid or we could harness the energy from the sea one trip to Portland bill will tell you how powerful else is around the shores of Portland.

No SHORTAGE OF WIND AND STORMS

There is I would argue a need for greener energy. Solution wind Tidal Solar

2. another consideration is the height of the stack at the prison the vote This could be considered harmful for the residence add staff of the prison plus the near this to the Verne common residence again emissions could affect health. Our local economy has relied on tourism and I believe in incinerator along the Jurassic Coast or the fact employment and other sectors related.

Jail House

I would recommend that we consider the stack in relation to the jailhouse café prison in the Verne Common residents and the grove Community. and prison

pull quote has been very successful in attractive cruise ships and although a local community is rather the cruise ships industry that is arrived in Portland I do believe that the road through Castletown could be very seriously congested by the waste another consideration is the number of schools then adding further traffic coming on and off the island white rages this will be caused by the impact on the 354 Dorchester in Portland Rd.

Concern . Worked near the Site wild life.

Urge to reject

Shore Power Can only be used
if there are no Major Power
Requirements on Board.

i.e. Erains no

2 Cruise Ships

takes
