

Consultee response for application **WP/20/00692/DCC** from **Melcombe Regis Ward**  
**- Cllr Jon Orrell**  
20/10/2020

- 1) Increased lorry traffic through congested main roads in Weymouth
- 2) A business plan that depends on local waste for decades , when we should be reducing waste thus rendering the plant obsolete. We ought to be insulating homes better and building wind/wave/tidal energy.
- 3) A danger that we may end up importing waste from outside the county
- 4) Better sites near Bournemouth which generates the majority of Dorset's waste
- 5) Damage to the amenity and air/water quality of the internationally recognised Jurassic coast
