

“Working with You” Update

For Littlemoor, Melcombe Regis, Westham and Underhill, January 2018

This is an annual project update of work taking place in the four priority areas. It is compiled by the Community Development Team of Weymouth & Portland Borough Council from consultation and research undertaken across the four areas, as well as meeting with relevant groups and individuals to identify priorities.

The purpose of this update is to help groups and service providers to tailor their services more specifically to the four priority area needs, as well as provide a guide for community groups and individuals who want to contribute to the community.

This is a living, working document and we will update it annually as projects progress and new priorities are identified.

To get involved with any of the projects or to add to the Update Plan, please get in touch with the Community Planning and Development Team.

Background

Certain areas of Weymouth and Portland experience significant and multiple difficulties and six wards fall within the top 20% of the most deprived communities in the country¹. Littlemoor, Melcombe Regis, Underhill and Westham continue to be Weymouth and Portland priority areas. Weymouth East Ward is a recent addition and work is yet to start in this area.

The health of people in Weymouth and Portland is varied compared with the England average. Life expectancy is 9.2 years lower for men and 6.2 years lower for women in the most deprived areas compared to the least deprived areas. An estimated 23.9% of adults in the Borough smoke and 25.9% are obese. The rates of sexually transmitted infections, hospital stays for self-harm and drug misuse are greater than the England average. In Year 6, 17.2% of children are classified as obese just slightly lower than the England average.²

Other issues of concern include crime, education and training. The figures are particularly high in parts of the four priority areas. There are significant levels of economic deprivation, a growing proportion of children live in households in receipt of benefits. 19.8% of children under 16 in Weymouth and Portland live in poverty, slightly lower than the England average of 21% but higher than the Dorset average of 13.7%³.

“Working with You” is a way of collaborative working in the priority areas of the Borough. It puts communities at the heart of partnership working practice by working closely with them to ensure that their priorities and those identified through partners

¹ Indices of Multiple Deprivation, 2015

² Public Health England; Weymouth & Portland Health Profile, 2015

³ Dorset County Council; The State of Dorset , 2017

and statistical data are brought together, drilled down and jointly agreed before projects are developed to address them.

“Working with You” aims to deliver positive area improvements, build trust and respect between communities and service delivery organisations, build community capacity and address the financial “pinch” experienced by organisations through combining resources and building strong and sustainable communities.

The Working with You principles are:

- To improve the quality of life in all communities concentrating initially on areas facing multiple challenges.
- To deliver positive action.
- To place communities at the heart of partnership working practice.
- To encourage collaborative working at all levels and to achieve more through co-ordinated action.

This update provides details of projects that are being delivered or in planning as a result of the inter agency work across the four original Working with You areas.

The plan is broken down into themes listed on the front page, listing projects/pieces of work that are taking place across all four priority areas and then listing work that may be taking place in just one priority area.

Health & Wellbeing – working across all priority areas

Project	Organisation	Update and any support required
<p>Advice & Information – Citizens Advice Support/ advice to individuals covering issues such as debt, employment, housing and relationship issues.</p>	Weymouth & Portland Citizens Advice	Exploring various options re more outreach service to Littlemoor. The GP surgery is now possible as a venue for work.
<p>Connect Support people with aphasia. Aphasia is a communication disability that can occur after a stroke or head injury. Connect aims to provide better information about local services and support. A local drop-in has been set up in Weymouth that is run by people with aphasia for people with aphasia.</p>	Connect	<p>On going project</p> <p>New drop in sessions set up in Weymouth</p>
