## NON-RESIDENTIAL PARKING GUIDANCE

These are the suggested car and cycle parking guidelines that will meet the likely and operational requirements of various establishments and business uses.

The figures should be interpreted as an initial, pragmatic, County-wide guide. The specific level of parking provision included in any development proposal should be agreed through joint discussions between the Local Highway Authority, Local Planning Authority, developer and his/her consultants. The agreed level of provision will take account of, amongst other things:

- The location of the proposed development and the area that it serves.
- The travel demand that is likely to be generated as a result.
- Off-site constraints and opportunities that influence the functionality of the site for the use(s) proposed.
- Mitigation measures proposed, including the delivery and implementation of Travel Planning and provisions.

[For larger sites, these factors should be explored and quantified in the transport appraisal or assessment submitted as part of the planning application for the proposed development.]
