

1. Does the CS provide clearly defined boundaries for every strategic allocation?
2. Flood risk: has every strategic allocation been subjected to a sequential and, if appropriate, exceptions test?
3. Flood Risk: is every site allocation supported, where necessary, by a site specific flood risk assessment to demonstrate that development will be safe for its lifetime without increasing flood risk elsewhere? (Ref: NPPF para 102)
4. Protection of designated habitats: Are all site allocations for residential development which are required to provide mitigation capable of providing SANG or alternative acceptable mitigation?
5. Do all site allocations satisfactorily address biodiversity?
